DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, pages 12-16, filed 10/10/2007, with respect to claims 1-30 have been fully considered and are persuasive. The rejection of claims 1-30 has been withdrawn.

Allowable Subject Matter

2. Claims 1-32 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior arts of record fail to teach or suggest in combination, the steps of "amplifying the signal amplitude of the analog signal that is attenuated by the transmission; filtering high-frequency interference of the analog signal at frequencies above the symbol rate, thereby generating an analog amplified filtered signal; discretizing the amplified filtered analog signal by means of an oversampled analog/digital converter to form a digital signal;"; in combination with "carrying out a cable approximation by simulation of the inverse of the cable transfer function on the digital signal by means of a digitally implemented cable approximation filter in order to obtain an equalized signal; and interpolating and then low-pass filtering the equalized signal by means of an interpolation and filter unit; and decimating the interpolated and filtered signal by means of a decimator which is arranged in

the control loop of a phase-locked loop for recovering the original data from the equalized signal in order to form "A METHOD FOR RECONSTRUCTING DATA, CLOCKED AT A SYMBOL RATE, FROM AN ANALOG SIGNAL WHICH HAS BEEN DISTORTED AND ATTENUATED BY TRANSMISSION OF A TRANSMISSION LINK HAVING A CABLE TRANSFER FUNCTION", as recited in claim 1, and some variation of wording as recited in claim 15 and 23, and further limitation of their respective dependent claims 2-14, 16-22 and 24-32.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
